4693 Checkweigher Unit Listing Sample Report

The 4693 Checkweigher offers an optional production and statistical package that lists eight unit weights on a line along with running total of units and elapsed time. Listing feature may be turned on or off without losing data for production reports.

The controller also prints a heading at the top of each page identifying product number and page number of report. A ">" symbol is printed next to any product weight that is considered a reject (out of spec'), and a "*" symbol is printed next to any value considered to be so far out of spec' that it is discarded from production analysis. (this limit is adjustable within the 4693 Checkweigher controller) The Checkweigher also prints a "Power Up" message to let you know if power to the controller has been turned off and back on again. Below is a sample of the list report's format.

51.19>	48.55>	49.97	50.05	48.80>	51.28	49.83	50.06	108	00:05
