

RL26 Universal Remote Display

*Low Cost 2" LED
Digital Display with
these great features:*

- **Super-Bright 2" High LED Display**
- **Six digits with floating decimal**
- **NEMA 4X fiberglass enclosure, built for harsh environments**
- **Optional Stainless Steel NEMA 4X enclosures available**
- **110/220 VAC or 12 VDC power source**
- **Works with any device transmitting digital data. Will work with virtually all weigh meters and scales**
- **20mA Active and Passive Current Loop, RS-232 and RS-422 connections**
- **Selectable protocol and data strings make configuration fast and simple**

The RL26 Universal Remote is a low-cost 2" High, 6 Digit Remote Digital Display designed for use in a wide variety of applications and environments. Although not intended for use in the direct sun, the Super-Bright display elements are easy to see up to 100 feet away, even in bright lighting.

Connections for the most popular serial data ports are standard, making the RL26 the right choice for data display from Checkweigh scales, Filling Systems, Bulk Baggers, Floor Scales, Railroad and Truck Scales, and Temperature, Pressure, or Flow sensors with digital output ports.

Options for Stainless Steel enclosures, Hazardous Area Configurations, including Class I, Div. 1, and custom programming provide the flexibility required to satisfy any application.

Thompson Scale Also Offers:
